THE CLOSE RELATIONSHIP between teacher and pupil is valuable as a child progresses in reading ability.

As education changes and develops, newer methods of teaching subject matter are used and evaluated. In the second grade this was true in the teaching of numbers while giving an extension of work learned in the previous year.

Several units are group assignments in the study of Indians, Pilgrims, Eskimoes, and the Holland people.

The children had a Language Round Up book which gave a more extensive idea of the usage of vocabulary.

Creative art work was introduced to the grade in relationship to their other work.
