

IT'S UP TO YOU to choose the classes you want to take. Sure there are some classes that are required but most of the classes a student takes he or she can determine. A student may decide to take a class like Creative Writing or Minorities, maybe Trigonometry or Microbiology & Entomology, it could be Home Mechanics or Family Relations, most likely Accounting or Ceramics and Pottery. Most people like the ENRICHMENT GROUP of classes like Journalism, Band, Cadet Teaching, Office Practice, Library Aide, CO-OP and Physical Education. When making out a class schedule decisions can be hard to make and variety of courses are available. Only you can make out the schedule that fits your wants and needs. Remember your shaping your academic life in school and future wants and needs come from your high school classes. Students are not only evaluated by their final academic ability but by the experience and skills acquired in the process.
