Injured

Imagine spending a senior year at home in bed, watching tv, being waited on, and teachers coming to you rather than you going to them! This might sound good, but is it what it's cracked up to be? John Smith didn't think so. He remarked, "It's definitely not the place to be your senior year — any year." John was in a car acci-

dent on October 24, 1987. He was sent to the U of M Medical Center for treatment of serious injuries, beginning a long convalescence.

The hardest thing for John was the fact that he missed out on a lot of fun with his friends at AHS. He came back to school in April to complete his senior year. John summarized: "It's not an experience everyone should go through, but something everyone should realize." 69
