

The good times, the bad, the happy times and the sad. We've shared them with our friends and foes. But what really makes AHS so special? It's got to be . . .

# The People

"But the important thing is, we all belong somewhere and with someone."

The brownnosers, the out-easters. The jocks, the cheerleaders, the wallflowers. We've been with these people most of our lives. They aren't just strange faces in the hallways — the faces, these people, are a part of us. We can all think of someone from one of these groups. Maybe we even belong to one. But the important thing is, we all belong somewhere and with someone. Long after we are gone and the halls are filled with other faces, we'll always remember the good times we had here, as well as the faces that make that time special to us. Just look around you. These faces are AHS.

"CAN'T YOU GO ANY FASTER?" echoed in the ears of Ashley's resident cripples Amy Burk, Scott McGillis, Traci Andersen, and Angela Felton. But even amidst the annoyed cries of "the healthy ones", these four troopers kept right on a 'crutchin'!
