

READY TO RACE? Tim Caswell sets up his CO₂ powered dragster for a time trial. Mr. Schestag is programing the computer to start and time the race.

Hard Work? It Pays Off

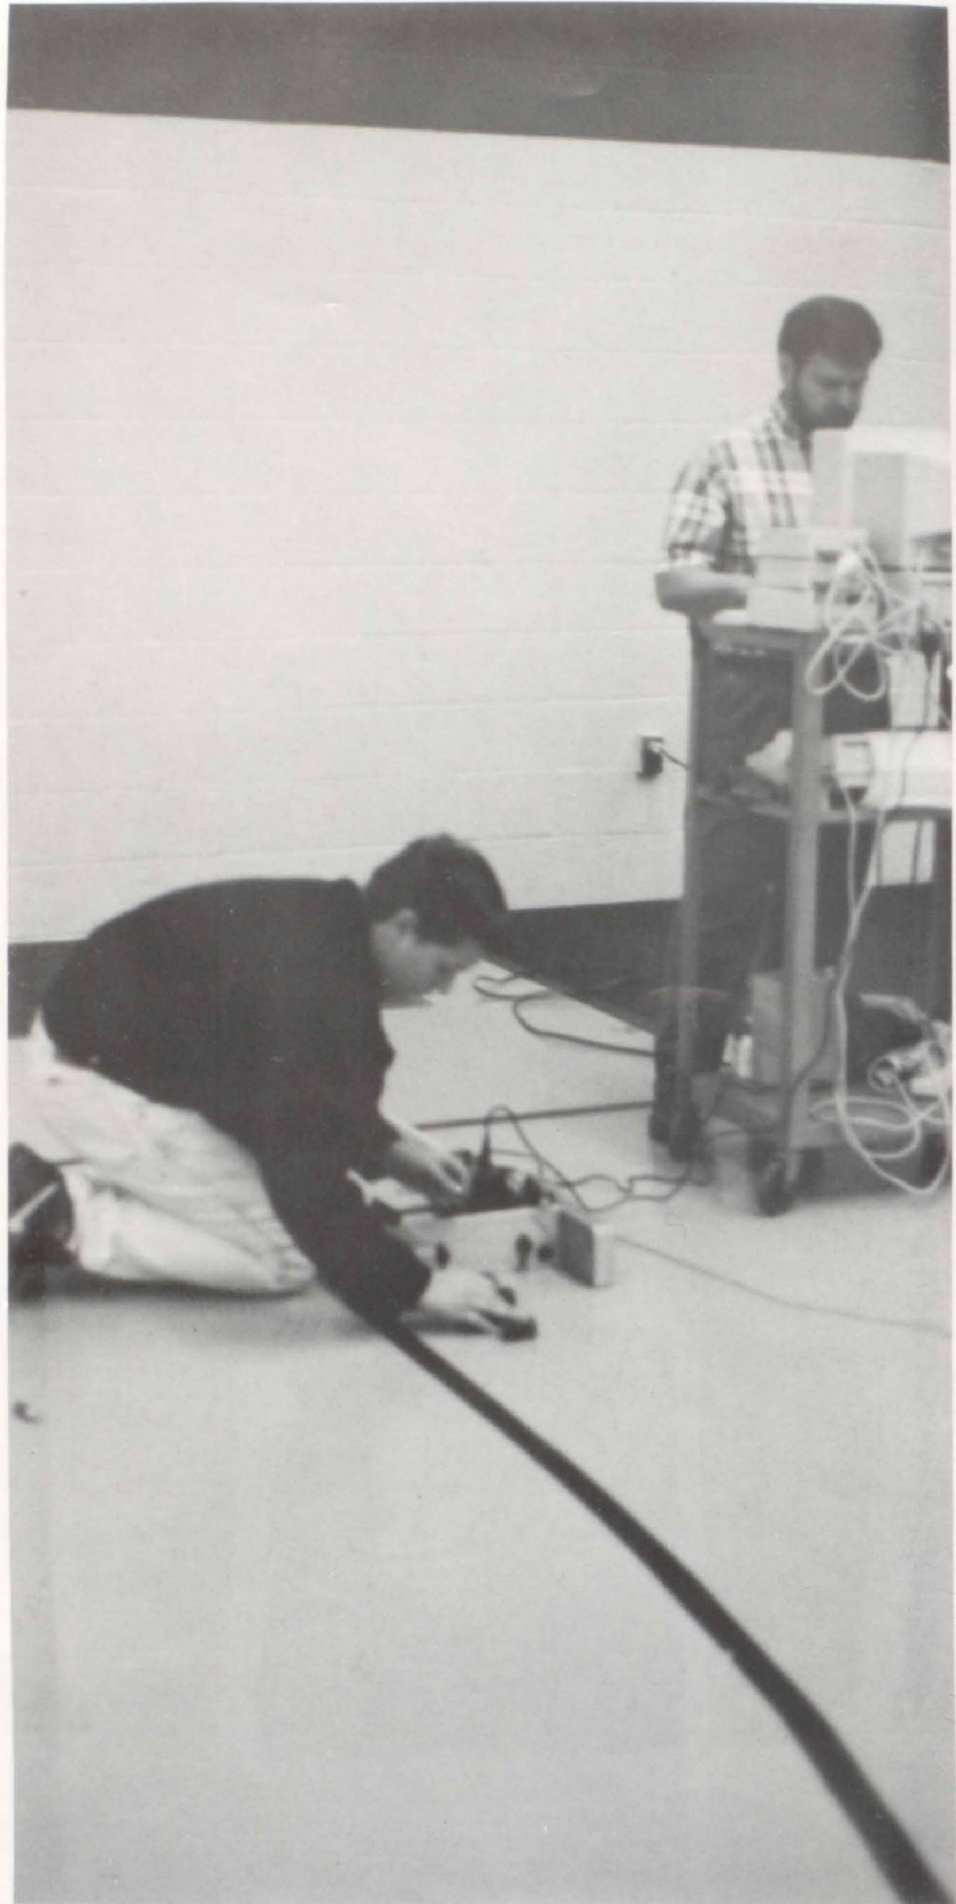

It takes time to make something that you can be proud of. Senior Brandon Malek has proven his woodworking skills by making a bench chest that shows nothing less than dedication and patience. Brandon remarked, "I wanted to make a bigger project, not just one that would take a couple of days."

Brandon was motivated because this bench chest was made as a gift to his girlfriend. Brandon summed up the feeling he received as he finished his project as ... "A sense of accomplishment."

MASTER CRAFTSMAN! Careful attention to detail is one of Brandon Malek's assets as he nears completion of his woodworking project.
