SCIENCE

BOY, IS THIS FUN. Chad Huntoon and Ellis Mason work together with an electric meter to see how much it's going to cost them to run their blender and radio.

Chemistry Tough!

For most students chemistry is a challenge — it's like no other class that the students have ever taken. "You have to forget everything you've learned in math and science classes and learn complete new rules," reflected junior, Jenny Powelson. All of the rules have exceptions and sometimes the exceptions even have some exceptions.

"It's a challenge and I'm glad that I stuck it out, because it's good preparation for college classes," Jenny said.

R. Wood

"OH, I'D BETTER GET AN A." Jenny Powelson works hard for her grades in chemistry, but no matter how tough it gets, she never gives up.
