

THE WONDER KIDS HAVE MORE THAN BRAINS

National Honor Society, the quiz team — the common thread running through both of these groups is, of course, that brainpower is the key to membership. This year's groups, however, demonstrated well that "smarts" alone were not all they had to offer.

Mrs. Karen Martinez, quiz team advisor, admitted that with only freshmen and sophomores on the varsity team, she was afraid this would be primarily a building year. But she wasn't taking into ac-

count the "guts" of this year's team. They not only won several matches, but during the meet held at Ashley they beat their arch rival, Breckenridge.

At Christmas time, NHS members showed that along with their high grade point average, they also possessed heart. The five members "adopted" a family and then held a rockathon, raising close to \$400. They were able to make a bleak Christmas much brighter for one family.
