Get Into It!

Students like hands-on classes

Cakes, computers, mixing bowls, video cameras, sewing needles, lathe, and an oven. What could we possibly do with these objects? These are all major ingredients needed for home economics and technology classes.

Amy Cermak commented, "Home Ec is a great class. I enjoyed learning the cooking utensils and how to make different types of food!"

Baking food is one thing, but building a concrete tower and producing a commercial is quite another!

"I was in the CAD group in Applied Tech class. It taught me so much about designing buildings and at the same time it was fun and interesting," Elliott Lowe commented.

Students enjoy themselves in both classes; it brings the creativity out!

CONGRATULATIONS! Mr. Gary Schestag awards Jason Denniston the Technology award for his fine work.

IMPRESSIVE! Mr. Ron Koppleberger, Mr. Larry Ostrander, and Mr. Carl Wayer watch in astonishment as Michael Strnad demonstrates what his robotic arm can do. All the hard work paid off for Mike as he won many awards for his creation.
