

Remember Magic

Memories
+ Moments

Memories are like flies in a Venus Fly Trap. They're stuck in your mind whether you like it or not. Everybody has one kind of memory or another. Seniors, especially. They have gone through six years of living in the elementary and six years of living in the high school. The memories of these twelve years are engraved in their minds, probably forever. David Strnad shared one of his many memories. "I remember the huge fight in fourth grade between Brian Krueger and David Po-

lash."

David chose to add to this memory. "Brian came up to me and told me he wanted to fight. I punched him. It was about Denise."

Some teachers even have memories of the seniors. For example, Mr. Larry Walden has a memory of Lisa Maier in her senior year. He said, "I remember when Lisa Maier tried to kill herself with a baseball bat and a red rubber playground ball."

Dennis Milledge had a crazy mem-

ory about his life in elementary. "I remember the fights on the snowhills with the older and much bigger kids to be King of the Mountain."

Other memories that may never escape the enclosure of your mind include the kickball games out on the football field, the games of tag played on the blacktop, and the all-famous boys-chase-girls phenomenon. All unforgettable memories.

I'LL MISS YOU! Lisa Maier's face reflects the mixed emotions most seniors feel on graduation night, the last time as a student.
