

# Brain Cell Marathon

J. Shaw

What can be said about math and science classes? Maybe that you should avoid them because they are extremely hard and tedious or maybe that they are only here to help you. Hey, maybe if you think really hard, they'll be fun.

"Advanced math was really fun because it was laid back and we got to work at our own pace with no pressure on us," shared **Joe Shaw**.

Science can also be fun. **Annette Cermak** commented on how fun her science class was, "We got to make a web-page at the end of the school year and it was pretty awesome."

J. Shaw

**D SCIENTISTS James Polash** fills glass tubes with air as part of chemistry class.

Math and Science

**IS THAT HEART STILL BEATING?** Dissecting a frog is a standard project in biology class. **Mike Milledge** goes at it as **Mr. Andersen** supervises.
