

Okay, but math and science classes just don't sound good to some people.

"Science just doesn't interest me, because it doesn't challenge me enough," stated **Cassandra Richmond**.

Math and science can be easy, hard, or just plain confusing. There are all these equations and experiments and sometimes you just don't know what to do. **Kari Deming** commented on how math is perplexing to her. "Math is confusing to me because of the equations. I have to remember which one to use. There are just too many."

Sometimes, though, science can be fun and challenging at

the same time. Chemistry is a good example of that. "It was fun to test pure oxygen with other elements because the girls messed up the whole experiment and had to do it over during lunch," gloated **Aaron Schulz**.

"Chemistry is like two classes, science and math. You have to know how to do basic algebra to complete some of the chemical equations. It's a hard class, but you end up having lots of fun during the lab experiments," stated **Brandon Beck**.

## THINGS I LIKE ABOUT MATH.

**Brandon Beck:** "It's so easy" (you can quote me on that).

**Lyndsay Goward:** "The cute teacher."

**Annette Cermak:** "Doing the graphs."

**Vicki Gilbert:** "There's *nothing* I like about math."

**Lucas Studt:** "I always manage to get help with it."

**AND THE ANSWER IS** **Gina Mepham, Ann Bancroft, Burt Cummings, Tisha Stoneman, and Holly Stoneman** all concentrate on their math assignment. "Math was a little bit hard this year, but my friends helped me through it," shared Ann.

**STUDY STUDY STUDY** Working hard on his math assignment, **Ron Boucher** takes a minute to look at the question before answering. "I really enjoy math because it challenges my mind," commented Ron.

**CAREFUL, DON'T SPILL IT** **Vicki Gilbert, Amanda Barror, and Brandon Beck** do an experiment in Chemistry. "I was nervous because it was our first experiment and I didn't want to blow anything up," shared Brandon.
