

FOR EACH PERSON

Everyone experiences it a little differently...

THE RIDE

But whoever you are, whatever you're doing,

IS DIFFERENT

Once the ride begins, there's no getting off.

BUT EXCITING

Sometimes it feels that the school year is like a ride just waiting to begin. At first it starts off kind of slow, then suddenly it's graduation. Although the year seems to fly by so fast, lots of wonderful memories are made in the process.

Many students, as well as teachers, felt this way. "The ride definitely began the first day. It has a lot of ups, downs, twists, flips, and turns," stated *Ms. Brandee Brower*. "I'm on the ride with a blindfold, and I never know what's going to happen next."

The seventh graders ride definitely began this year. "I was very nervous because I thought that I wasn't going to get to class on time," exclaimed *Shana Pupava*.

This is definitely a big year for the seniors. They have not only graduation

to think about, but also what to do with the rest of their lives. "It's been nice, the year has been going by fast," remarked *John Polash*. Sometimes though, the senior year isn't as stressed as it seems. "You can take a lot of easier classes," stated *Joe Shaw*. "It has been a lot of fun, and I have made a lot of memories. Most of them have been good, but some are nightmares, like never being able to get anything done in journalism because everyone wanted me to print their pictures."

With every school year, another ride begins. For some, that ride is quite long, with a lot more twists and turns. For others, that ride is a bit shorter, but sometimes just as complicated. But for everyone, riding that one ride makes memories that last a lifetime.

SWEET THANG "I love to talk to my friends and watch basketball. I think that it is a very fun sport," stated seventh grade sweetheart *Amber Ingersoll*.
