THE ONE THAT GOT AWAY

What else would you be able to say about this season? Some would say that the season was cursed, maybe even forsaken from the beginning. In fact, the Bears started out the season with a surprising bang. Going three and one in the first four games, they had high hopes for the remainder of the season.

Within the first few games of conference play, they had hopes of winning the title. With the new additions of Coleman and Montabella to the conference, The Michigan State Athletec Conference became much tougher. Being the smaller school out of the group, Ashley had nothing to lose.

Despite the team's best efforts, they fell short of pre-season goals.

Although the season was disappointing, the team was able to stay together. This might not seem like that big of an accomplishment, but going through a season such as this one, and not quitting on one another is as tough as it gets.
