

Math & Science

Yakzeill

Good times! • *Shana Pupava* loves her math class so much - it's the highlight of her day here at AHS.

What was I writing? • *Kyle Densmore* gets right into his work during his Pre-Algebra class with Mr. Grollmund.

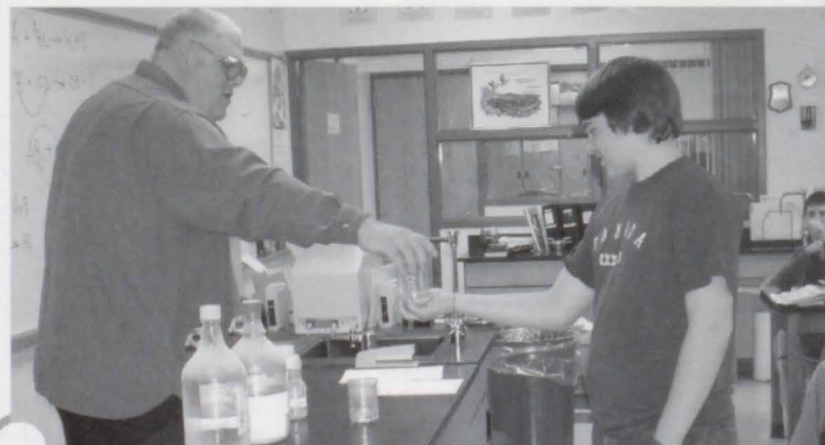

What is he talking about? • *Troy Yelsik, Courtney McBride, and Jake Oswald* have their heads in the clouds during an intense hour of Science 9 with Mr. Larsen.

How do I get outta here? • *Jason Cooley* attempts to navigate his way out of the burr infested field where the Explorations in Science did most of their bug collecting.

Give me math, or give me death • *Nikki Limbert* is threatened by a pen during 7th hour Advanced Math. Mr. Grollmund figured that this "exercise" might help the day's lesson sink in a little better.

Here ... touch this! • *Josh Hunt* graciously offers himself to an experiment in science class. Mr. Larsen promised that he wouldn't get hurt ... too bad, at least!
