NHS & SADD

I went to the prom and decided to get in the car with a drunk driver. The consequences are that everybody in the car ended up dead. I was only 17.

JUST A LITTLE FUN
I skipped prom to party with my boyfriend. After a few drinks, I drove to pick up some of my friends from prom. I didn't notice the road curved, and crashed into a tree. I killed my boyfriend and my two best friends. I'm currently in a coma in the local hospital. If I live, I will be charged with murder and spend the rest of my life in prison.
