◀ ANOTHER EARTH OUT THERE?

Using the Kepler space observatory, NASA astronomers discovered a pair of planets roughly the same size as Earth about 950 light years away. While the temperatures on the new planets were an unlivable 1,400 degrees, their discovery brought hope that projects like Kepler will continue to successfully find new planets.

“Don’t let the noise of others’ opinions drown out your own inner voice. And most important, have the courage to follow your heart and intuition. They somehow already know what you truly want to become.”
